simStateSpace: Internal Tests

Ivan Jacob Agaloos Pesigan

Tests

```
#> test-simStateSpace-lin-sde-cov-eta
#> Test passed with 3 successes.

#> test-simStateSpace-lin-sde-cov-y

#> Test passed with 1 success.

#> test-simStateSpace-lin-sde-mean-eta

#> Test passed with 1 success.

#> test-simStateSpace-lin-sde-mean-y

#> Test passed with 1 success.

#> test-simStateSpace-project-to-hurwitz

#> -- Error: test-simStateSpace-project-to-hurwitz< 0 ------------------------------------------------
#> Error in `SpectralAbscissa(x = x)`: object '_simStateSpace_SpectralAbscissa' not found
#> Backtrace:
#>     x
#>  1. +-testthat::expect_true(SpectralAbscissa(x = x) < 0)
#>  2. | \-testthat::quasi_label(enquo(object), label)
#>  3. |   \-rlang::eval_bare(expr, quo_get_env(quo))
#>  4. \-global SpectralAbscissa(x = x)

#> Error:
#> !  Test failed with 1 failure and 0 successes.
```

Environment

```
ls()

#> [1] "root"
```

Class

```
#> [[1]]
#> [1] "root_criterion"
```
