simStateSpace: Simulate Data from State Space Models

Ivan Jacob Agaloos Pesigan

Description

Provides a streamlined and user-friendly framework for simulating data in state space models, particularly when the number of subjects/units (n) exceeds one, a scenario commonly encountered in social and behavioral sciences. This package was designed to generate data for the simulations performed in Pesigan, Russell, and Chow (2025: https://doi.org/10.1037/met0000779).

Installation

You can install the CRAN release of `simStateSpace` with:

```
install.packages("simStateSpace")
```

You can install the development version of `simStateSpace` from GitHub with:

```
if (!require("pak")) install.packages("pak")
pak::pkg_install("jeksterslab/simStateSpace")
```

More Information

See GitHub Pages for package documentation.
