simStateSpace: Internal Tests

Ivan Jacob Agaloos Pesigan

Tests

```
#> test-simStateSpace-check-simulation
#> -- Error: test-simStateSpace-check-simulation ----------------------------------
#> Error in `.SimSSMKernel(n = n, time = time, delta_t = delta_t, mu0 = par$mu0, sigma0_l = par$sigm
#> Backtrace:
#>     x
#>  1. +-testthat::expect_s3_class(...)
#>  2. | \-testthat::quasi_label(enquo(object))
#>  3. |   \-rlang::eval_bare(expr, quo_get_env(quo))
#>  4. \-Run(alpha = matrix(data = 0, nrow = p))
#>  5.   +-base::do.call(what = fun, args = a)
#>  6.   \-global `<fn>`(...)
#>  7.     \-global .SimSSMData(...)
#>  8.       \-global .SimSSMKernel(...)

#> Error:
#> !  Test failed with 1 failure and 0 successes.
```

Environment

```
ls()

#> [1] "root"
```

Class

```
#> [[1]]
#> [1] "root_criterion"
```
